EXPERIENCE

JaniExpress/Aginelo Productions, Carlsbad, CA – *Web Developer*

09/2017 - PRESENT

Working closely with business owners in improving their web presence and marketing online. I develop and design a website that meets the client's expectations, then move forward to adding details about the company. Set up or update social media accounts for the business.

Intellisurvey, Ladera Ranch, CA — *Software Engineer*

03/2016 - 07/2017

Provided continued maintenance and development of bug fixes and patch sets for existing web applications. Worked closely with project managers to implement components and features to a fast growing framework. Proposed new methods for improving client side infrastructure and time-saving production methods. Jack of all trades skill set. I was able to accomplish task for a front-end, back-end, or support developer, when necessary.

CoderCamps, Oakland, CA — *Assistant Instructor Intern*

10/2015 - 01/2016

Assisted students with their web projects or homework daily. Also worked closely with the instructor to figure out a better way for the students to comprehend the curriculum.

EDUCATION

Palomar College, San Marcos, CA — *Computer Science*

2013 - 2015

Various courses in programming and algorithms.
